EXPERIENCE

League Inc **Apr 2026 - Present**
Software Developer (Android) **Ottawa, ON**

- Kotlin Developer working on League's platform SDK, impacting millions of users across dozens of benefits/insurance apps.
- Built Live Chat interface for connecting healthcare providers to users via League's AI Agents, and customized client solutions.

Flex Artificial Intelligence **Jan 2024 – Mar 2026**
Senior Android Engineer **Ottawa, ON**

- Lead engineer building Flex Fitness for Android, a workout companion & social media app.
- Responsibilities included architecture, team management, agile planning, and DevOps.
- Enforce usage of modern technologies; Kotlin, Jetpack Compose, Flow, Coroutines, MVVM, and Clean Architecture.

Konrad Group **Sep 2018 – Jan 2024**
Senior Software Developer **Toronto, ON**

Previously: Software Developer, Associate Software Developer, Software Developer Intern

- Kotlin and Java developer, contributing to industry leading Android apps for high impact clients.
 - **American financial services app with 14 million users.**
 - Pod lead, responsible for end-to-end feature architecture, development and deployment.
 - Fixed critical bugs in the registration flow, improving sign-up conversion rate by 5%.
 - **At-home workout streaming platform for a popular American fitness brand.**
 - Implemented a custom OAuth flow with QR code verification. Deployed new system with a 100% crash free rate.
 - Created an interactive "Blur View" in XML, allowing us to blur streamed video in real time, while optimizing for custom hardware.
- Played an active role in candidate evaluation by conducting technical interviews.
